Verification Opinion

Verification Opinion: CFV 637319

Verified with comments	
Based on the process and procedures conducted, the GHG statement contained in the GHG Report "Greenhouse Gas Emissions Report as per ISO 14064-1: 2018", dated 9th June 2026, submitted on 09/06/2025, produced by JK Tyre & Industries Ltd. Link House 3 Bahadur Shah Zafar Marg New Delhi 110 002 India	• is materially correct and is a fair representation of GHG data and information. • has been prepared in accordance with ISO 14064-1: 2018, & it's principles.
The following improvements were raised in relation to future reporting	• Organization should complete the GHG inventory including other significant categories which are currently excluded. • End of life category is calculated using reference from European tyre and rubber manufacturer association (ETRMA) scenario, this may be improved with the actual practices of different countries for tyre waste management where tyre product of the organization is used considering both domestic and international consumption as this end of life category deals with the organization's own product tracking and it's disposal after it's life is completed.
The verification was conducted in accordance with the GHG Statement's intended use.

Note: BSI Group India Pvt. Ltd. is independent to and has no financial interest in JK Tyre & Industries Ltd. This 3rd party Verification Opinion has been prepared JK Tyre & Industries Ltd. only for the purposes of verifying its statement relating to its GHG emissions more particularly described in the scope above. It was not prepared for any other purpose. In making this Statement, BSI India Pvt. Ltd. has assumed that all information provided to it by JK Tyre & Industries Ltd. is true, accurate and complete: BSI India Pvt. Ltd. accepts no liability to any third party who places reliance on this statement.

Certificate Number and date of issuance of opinion: CFV 637319, 24th June 2026

Verification Engagement

Organization	JK Tyre & Industries Ltd.
Responsible party	JK Tyre & Industries Ltd.
Verification Objectives	To express an opinion on whether the organizational GHG Statement which is historical in nature: • Is accurate, materially correct, and is a fair representation of GHG data and information. • Has been prepared in accordance with ISO14064-1:2018, "Greenhouse gases — Part 1: Specification with guidance at the organisation level for quantification and reporting of greenhouse gas emissions and removals".
Materiality Level	5%
Level of Assurance	Reasonable
Intended Use	The intended user of the GHG Statement and Verification Opinion is: • Existing and potential customers • Regulators and governmental entities • Society in general This report is prepared with the intent of communicating the GHG emissions related to the organizational value additions to its stakeholders. While doing so the report also ensures the following: • Communicating organizational GHG performance to Customers and Potential customers • Communicating organizational resolve in GHG performance improvements to the society.
Verification evidence gathering procedures	• Evaluation of the monitoring and controls systems through interviewing employee's observation & inquiry • Verification of the data through sampling recalculation, retracing, cross checking, and reconciliation. • Data is verified through manual consumption logs, SAP records, vendor service reports, invoices, calibration reports etc.

Verification Standards	The verification was carried out in accordance with ISO 14064-3: 2019, ISO 14065: 2020 and ISO 17029: 2019
Note: JK Tyre & Industries Ltd. is responsible for the preparation and fair presentation of the GHG statement and report in accordance with the agreed criteria. BSI Group India Pvt Ltd is responsible for expressing an opinion on the GHG statement based on the verification.	

Organizational GHG Statement

Organization		JK Tyre & Industries Ltd Patriot House 3, Bahadur Shah Zafar Marg New Delhi 110 002 India
Organizations GHG Report containing GHG Statement		By JK Tyre & Industries Ltd. submitted on 9th June 2026 titled Greenhouse gas emissions annual report for financial period 2025-26.
Organizational Boundary		Operational Control
Locations included in the Organizational Boundary		See Appendix A
Scope of activities:		'Design and Manufacture of Conventional (Bias), Radial and Agricultural Tyres.'
Reporting Boundary:	Direct GHG Emissions Category-1(Scope 1)	Combustion of: • Fuel for boiler operation- Coal • Diesel (Stationary & Movable) • Petrol(movable) • LPG consumption • Natural Gas • Dissolved acetylene Leakages of: • Refrigerants leaks (HFCs). • CO2 from Fire Extinguisher
	Indirect GHG Emissions from imported energy Category-2(Scope 2)	Imported Electricity from regional grid (this also includes electricity purchases from third party PPA agreement and energy purchase from energy exchanges).
	Indirect GHG emissions from transportation Category-3(Scope 3)	• Transportation of raw material. • Transportation of finished goods. • Employee Commute. • Business Commute. • Waste Transportation. • Upstream emissions from fuel and energy purchased.

	Indirect GHG emissions from purchase of goods and services used by company Category-4(Scope 3 in GHG P)	• Purchased goods (raw material, equipment, machine spares) Coverage is approx. 94% of overall purchase amount. • Capital goods. • Waste disposal.
	Indirect GHG emissions from sold products Category-5(Scope 3)	• End of life treatment of sold products.
Exclusions from Reporting Boundary:		Currently the below sources are excluded due to the unavailability of desired data which can be used with high level of confidence to ensure accuracy in measurement. **Category-3:** Import material transportation other than raw material are excluded Secondary and tertiary movement is excluded **Category-4:** Indirect GHG emissions from services used by organization and leased assets **Category 5:** Indirect GHG emissions associated with the use of sold products and downstream leased assets from the organization
Criteria for developing the organizational GHG Inventory:		ISO14064-1: 2018
Reporting Period		1st April 2025 to 31st March 2026

Emission Summary (1st April 2025 to 31st March 2026)

JK Tyre & Industries Ltd.	JKT (tCO2e)- Market Based	JKT (tCO2e)- Location Based
Direct Emissions Category-1 (scope 1)	**191555.84**	**191555.84**
Indirect Emissions from Imported Energy Category-2 (scope 2)	**170446.71**	**289358.13**
Indirect GHG emissions from transportation Category-3 (Scope 3)	**249583.12**	**249583.12**
Indirect GHG emissions from products purchased Category-4 (Scope 3)	**1894025.08**	**1894025.08**
Total Emissions for Cat-1,2,3	**2505610.75**	**2624522.17**
Indirect GHG emissions from product sold Category-5 (Scope 3): End of life treatment of tyres	***(104835.75)**	***(104835.75)**
Total Emissions reported	**2400775**	**2519686.42**

**End of life treatment of tyre waste are calculated based upon the LCA studies conducted by the organization using ISO 14040/14044 standard, and derived carbon emissions factor, the results showcases that the tyre after its life completion, i.e. end of life is recycled as per the scenarios considered in the paper presented by European tyre and rubber manufacturers association(ETRMA), which highlights the usage of waste tyres in energy recovery using incineration, and credits for fuel replacement has been considered as a result.*
